### FIELD SEEDS

**PERSIAN CLOVER**—A very valuable clover for the South. Furnishes splendid grazing for cattle from December until June, and yields 2 to 3 tons of rich nutritious hay per acre, which can be easily cut and cures very quickly. Is a splendid soil builder. Sow 6 to 8 pounds per acre from September to November, and cover lightly. Reseeds itself even when closely grazed. Makes an upright growth 2 to 3 feet high. Will stand wetter lands than most clovers. Seed should be inoculated with NITRAGIN. See page 10. **Price: Lb. 75c; 5 lbs. $3.50 postpaid. Write for prices on larger quantities.**

**SWEET CLOVER OR MELILOTUS**—Also known as Bokhara Clover. As a land-builder it has few equals. It is fine for raising bees and to build up your poor land. Sow 12 pounds per acre in February planting. **Lb. 45c; 5 lbs. $2.00, postpaid.**

**YELLOW BLOSSOM SWEET CLOVER**—The Yellow Blossom type is very similar to that of the White Blossom. For those who wish to use Sweet Clover for pasture, hay and bee purposes, we would advise the use of the Yellow Blossom type. **Lb. 25c; 5 lbs. 75c, postpaid. Write for prices on larger quantities.**

**HAIRY PERUVIAN ALFALFA**—Tall, vigorous growing and will live as long as any type where the winters are not too cold and where there is summer moisture. Gives you more cuttings than any other type and after each cutting it recovers rapidly. Sow during September and October in thoroughly prepared, well drained soil, broadcast or in drills at the rate of 15 to 20 pounds per acre. Seed should be inoculated with NITRAGIN. **Prices: Lb. 75c; 5 lbs. $3.50, postpaid. Write for prices on larger quantities.**

**RED CLOVER**—Sow in the fall or spring. 12 to 15 lbs. to the acre. Largely used in combination with other grasses and clovers for permanent pastures. **Prices: Lb. 75c; 5 lbs. $3.50, postpaid. Write for prices on larger quantities.**

**WHITE DUTCH CLOVER**—This clover does well in the Central South. Most all permanent lawn and pasture mixtures should have some White Clover. By itself it makes good grazing for cattle and sheep. **Lb. $1.15; 5 lbs. $5.00, postpaid. Write for prices on larger quantities.**

**ALYCE CLOVER**—This new clover should be on every farm in the South. Grows tall, furnishes much more hay or pasture of finer quality feeding value. Planted spring and early summer at the rate of 10 to 12 lbs. per acre. **75c lb.; 5 lbs. $3.50, postpaid.**

**FANCY BERMUDA**—Most valuable grass for the South. Grows on all kinds, from heaviest clay to the lightest sand and furnishes abundant pasturage. Bermuda withstands drought and scorching summer sun. Sow 5 to 10 pounds per acre (2 pounds per 1,000 sq. ft. for lawns), March 1 to September 1 in lower South. **Seed will not germinate in cold ground.** 20 to 30 days to germinate. **1 Lb. 95c; 5 lbs. $4.50, postpaid.**

**HULLED BERMUDA**—Germinates in a week with proper moisture conditions, almost as quick as Rye Grass. **1 Lb. $1.25; 5 lbs. $6.00, postpaid.**

**CARPET GRASS**—Carpet Grass is one of the most valuable pasture grasses for the lower South. It grows on poor sandy soils better than Bermuda and does well on most any soil with a fair amount of moisture. **1 Lb. 65c; 5 lbs. $3.00, postpaid.**

**STECKLER'S FIELD RYE (Abruzzi)—Lb. 20c; 5 lbs. 85c, postpaid.**

# STECKLER'S WINTER LAWN GRASS SEED

Lawn of Winter Grass

### ITALIAN
## RYE GRASS
### AMERICAN GROWN

The winter grass for all the South. Superior to foreign grown Italian and English Rye Grass seed. Our fancy seed is heavier and more plump, full of vitality, quick to start and strong in growth. It is a fast-growing annual grass with long flat leaves, growing in tufts if left uncut. It is valuable to dairymen for winter and spring grazing, but its great use is for winter and spring lawns.

Scratch seed in Bermuda sod for green lawn until the Bermuda comes out again in summer. By itself it makes a delightful green lawn, in sun or shade, all fall, winter and spring. It stands repeated mowing on lawn or golf green. Sow 10 lbs. per 1,000 sq. ft. (50x20 ft.) for lawn; 50 lbs. per acre for pasture. **Prices: Fancy Seed, lb. 30c; 5 lbs. $1.00, postpaid. Not prepaid, 10 lbs. $1.50; 25 lbs. $3.50; 50 lbs. $6.25; 100 lbs. $12.00; 1,000 lbs. $11.50.**

### AUSTRIAN WINTER PEAS
# DOUBLES YOUR
## CORN and COTTON YIELDS

Rapidly climbing to the top as the leading soil-builder and winter crop throughout the entire South, because of its large, heavy growth on practically all soils and its ability to resist winter freezes. Matures two weeks ahead of Vetch and makes a splendid temporary pasture in late winter. Furnishes grazing for your livestock, and decays rapidly when plowed under.

Sow Austrian Winter Peas during September and October, in drills, at the rate of 30 pounds per acre and cover 2 inches. May also be sown broadcast and disked in. Sowing the seed broadcast in cotton middles and straddling the rows with a two-horse cultivator with the disk hillers or plows is a very good method of covering. **Lb. 25c; 5 lbs. 75c, postpaid. Not prepaid: 10 lbs. 90c; 25 lbs. $2.00; 50 lbs. $3.55; 100 lbs. $6.75; 1,000 lbs. $64.50.**

## HAIRY VETCH
### An Outstanding and Reliable Soil Builder

Poor soil can soon be made rich with it. Planted combined with small grain, such as Oats and Rye or seeded alone makes splendid winter and spring pasturage. Stands severe winters without injury, grows on practically all types of soil. Vetch is usually turned under in early April. A good crop is equivalent to 250 pounds or more of Nitrate of Soda and valuable humus is put into the soil. Planted September to December, sow 20 to 25 pounds per acre alone, 15 pounds with small grain. Inoculate with NITRAGIN C. **Prices: Lb. 35c; 5 lbs. $1.40; postpaid. Not prepaid: 10 lbs. $1.80; 25 lbs. $4.75; 50 lbs. $8.50; 100 lbs. $16.00. Write for prices on larger quantities**

## COMMON VETCH

Common Vetch prefers sandy loam, well drained, but will produce a good crop on most any other soil where water does not stand. When planted alone it requires 30 to 40 lbs. to the acre, half that quantity is sufficient when sown with small grain. Seed should be inoculated with Nitragin. **Prices: Lb. 30c; 5 lbs. 95c, postpaid. Not prepaid, 10 lbs. $1.10; 25 lbs. $2.50; 100 lbs. $8.90.**

## HUNGARIAN VETCH

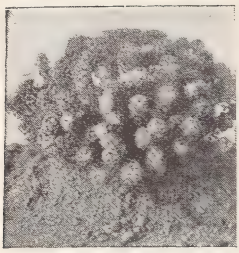
# Beautiful Flowers

## Prize Winning Flower Seeds

### Loads of Beautiful Flowers



**ALYSSUM**
**Violet Queen**

Flower seeds are something that everyone is interested in because hidden within their tiny coats are the qualities which, after they sprout, and grow, and flower, reveal colorings and characteristics almost unbelievable.

Nothing will give you so many blooms for such a long time as these annuals.

There is no excuse for your not having some flowers around your house when it just takes a few packets of seed, sunshine and rain to have them in all their beauty.

Our seeds are tested and sent to you in big full-measure packets. The instructions are on every packet for planting each kind of seed.

**ALYSSUM (Madwort)**—Splendid little annual for edging and bedding. Sow July-November. Height 6 to 9 inches.
- **Little Gem**—Dwarf, compact grower thickly covered with small white flowers. **Pkt. 10c; oz. $1.00.**
- **Violet Queen**—Similar to Little Gem, but carries an abundance of delicate, lilac-colored blooms. **Pkt. 10c; ½ oz. 75c.**

**AQUILEGIA**

**ANTIRRHINUM (Snapdragon)**—For exquisite beauty few flowers equal the modern Snapdragons. They make glorious massed beds and borders, and are extremely well adapted for cutting. Sow August-November. Height 2 to 3 feet.
- **Crimson King**—Rich crimson, semi-tall sort. Very good for bedding. **Pkt. 20c.**
- **Canary Bird**—A very fine variety of giant yellow blooms. **Pkt. 20c.**
- **Loveliness**—Rose pink, giant flowered. **Pkt. 20c.**
- **Snowflake**—Pure snow-white blooms. Tall, large flowering. **Pkt. 20c.**
- **Pinkie.** Clear rose of the Majus. Grandiflorum type and rust proof. **Pkt. 20c.**
- **Shasta.** Pure white, a very desirable variety and rust proof. **Pkt. 20c.**
- **Rust Resistant California Giant Mixture.** This mixture of rust proof Snapdragons is the best all around type, equally fine for border or for cutting. **Pkt. 20c; oz. $2.00.**

**AQUILEGIA (Columbine)—Long-spurred Hybrid Mixed.** Few perennials rival the Aquilegia with their odd-shape flowers. Prefer partly shaded location. Sow during October-November. Height 2½ feet. **Pkt. 25c.**

**ARMERIA (Thrift, Sea Pink)**—Dwarf-growing perennials with grassy leaves and a tufted habit of growth. The flowers are borne in globular heads during March to May, and the plants are suitable for edgings to borders. **Pkt. 15c.**

**BALSAM**
**Camelia Flowered**

**BALSAM (Lady-Slipper)**—Greatly improved strain, with large, waxy, camelia-like blooms in soft and brilliant shades and combinations. Sow the seed during July and August in a well-drained soil. Delight in a sunny location. Height 2 feet.
- **Mixed**—Improved. Camelia-flowered. Very double and beautiful colors. **Pkt. 10c; oz. $1.00.**
- **Camelia Flora Alba**—Pure white flowers, used for bouquets. None.

**CALENDULA (Pot Marigold)**—One of our most desirable fall flowers. They are of easy culture, very prolific bloomers, and produce a splendid effect in beds and massed borders. Highly prized as cut flowers. Sow August-October. Height 1 to 1½ feet.
